

Jana Eldesouky

Frontend Developer | Alexandria, Egypt
janadesouky4321@gmail.com | +20 1229373166

SUMMARY

Motivated Frontend Developer with hands-on experience building responsive and user-friendly web applications using React.js, Next.js, and Vue.js. Strong understanding of modern JavaScript (ES6+), responsive design, and UI implementation. Passionate about writing clean, maintainable code and continuously improving frontend performance and usability. Seeking to contribute to a collaborative engineering team and grow under experienced mentorship.

Experience

FullStack – RMZ Tech

Alexandria, Egypt | 2023

- Designed and developed responsive, SEO-optimized web applications using Vue.js, and Tailwind CSS.
- Entered and managed large volumes of structured data in MySQL databases
- Assisted with form validation, data sanitization, and database queries
- Gained experience with admin dashboards for reviewing user data

Full-Stack Development Scholarship – Amideast

Remote | 2022–2023

- Regularly entered and tested form-based inputs across various web platforms
- Helped clean and organize project datasets for team analysis
- Built small tools for data collection and formatting in C#

Education

Cyber Security Major Faculty of computers & data science, Alexandria University
